

Client: Target Distribution Center, Lake City, Florida - USA

Application: Industrial Cold Storage Distribution Center

Aspirating Detectors used: 22 x Cirrus Pro X4 Aspirating Detectors

Reasons for using Cirrus Pro Aspirating Detectors:

- Cirrus Pro Detectors do not provide unwanted alarms from temperature changes and temperature extremes.
- Cirrus Pro Detectors can respond to fire conditions in advance of standard point detection.
- Aspirating detection utilizes 'active' air sampling through the use of sampling holes drilled into sampling pipework. Each sampling hole is spaced as if it were a smoke detector to ensure compliance with local standards.
- Cirrus Pro Detectors do not provide unwanted alarms from airborne dust and other pollutants.
- Cirrus Pro Detectors are a sensitive yet stable fire detection system responding to products of combustion.

The Cirrus Pro Series Fire Detectors can provide an alarm at the earliest stages of a fire, giving you the time you need to safeguard your Retail and Warehousing facility and limit the time that could be lost to the unexpected occurrence of a fire.
