

**Waltons**  
All your business needs

**Client:** Waltons Stationary, Durban - South Africa

**Application:** High Bay Stationary Warehouse

**Aspirating Detector used:** Cirrus Pro 200 aspirating detectors

**Reasons for using Cirrus Pro Aspirating Detectors:**

- Cirrus Pro Detectors do not provide unwanted alarms from airborne dust and other pollutants.
- Cirrus Pro Detectors do not provide unwanted alarms from temperature changes and temperature extremes.
- Cirrus Pro Detectors can respond to fire conditions in advance of standard point detection.
- Aspirating detection utilises 'active' air sampling through the use of sampling holes drilled into sampling pipework.
- Service and maintenance can be carried out at the Cirrus Pro Detectors and dedicated test points.
- Cirrus Pro Detectors do not provide unwanted alarms by humidity and condensation changes.
- Cirrus Pro Detectors are a sensitive yet stable fire detection system responding to products of combustion.
- FM/UL Approved.
